Outlook

In general, D-BOX will focus its development initiatives on three major areas: movie theatres, video games, and home theatre.

In the commercial theatre market, the Corporation intends to continue signing agreements with new exhibitors, to increase the number of motion units (MFX seats) installed at existing ones and to obtain additional content from movie studios. In regards to the home entertainment segment which includes the video gaming and home theatre markets, the Corporation aims to expand its distribution network mostly thru new OEM (Original Equipment Manufacturers) agreements aimed to complement direct sales efforts (Video Games). D-BOX believes that further tapping into these markets could drive significant revenues while boosting recognition of its technology.

About D-BOX

D-BOX Technologies designs and manufactures leading edge high-technology motion systems mainly suited to the needs of the entertainment industry. With its unique patented technology, D-BOX Motion Code™, it uses motion codes specifically programmed for each film, TV program or video game, which are sent to a motion generating system integrated within either a platform or a seat. The resulting motion is perfectly synchronised with all onscreen action, creating an unmatched realistic, immersive experience. To date, D-BOX Motion Code™ is available on over 850 titles. Accordingly, many prominent Hollywood studios have started embedding D-BOX Motion Code™ on selected high definition Blu-ray™ releases. By reaching agreements with the leaders of both the motion picture and gaming industries, D-BOX's award-winning motion technology is gradually proving itself as a new global standard in the entertainment world.
